

Export your final project to a "PDF Print"

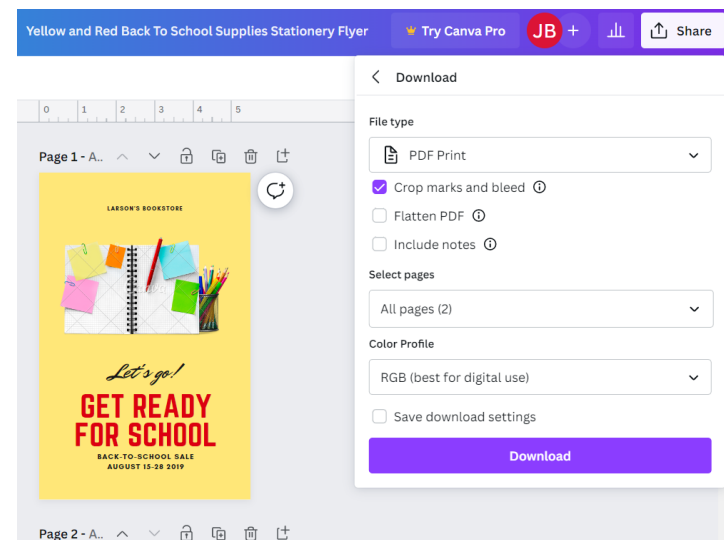

PDF Print:

Build document size to final trim size (finish size).

If your image goes all the way to the edge of the sheet, we need an extra 1/8 inch of bleed. If that is the case, extend your artwork, boxes, etc. 1/8 inch past the document size and let it "fall off the page".

If the image does not need to go the edge of the sheet, leave at least 1/4 inch white margin all the way around.

Your final project (PDF) should look like this.
